* Pour obtenir une évaluation complète de la sécurité et de la valeur de la batterie, tenez compte des éléments suivants :

1. Les anomalies et dysfonctionnements éventuels de la batterie et des cellules ne sont pas révélés par le SoHSCAN. Elles peuvent être facilement détectées, jusqu'au niveau de la cellule, à l'aide du test Flash AVILOG.
2. L'état de santé (SoH) numérisé (lecture) par le fabricant (OEM) de la batterie d'entraînement est le SoH supposé par le système de gestion de la batterie (BMS). Il peut s'écarter considérablement du véritable SoH, et AVILOG n'assume aucune responsabilité quant à son exactitude.
3. Le SoH réel peut être déterminé avec précision à l'aide du test PREMIUM AVILOG.
